Bilateral Meetings

- Tuesday 10:00 - 16:00

Description

DunavNET was established in 2006 with main development team based in Novi Sad and business development office in Ireland. Company's core expertise is IoT and cloud technologies. The company is focused on design, implementation and deployment of advanced IoT solutions, from hardware devices equipped with adequate sensors and communication interfaces to cloud based core functionality as well as client web and mobile applications. DunavNET is actively participating in international research and innovation collaborative projects (FP7 and H2020) since 2008, addressing various aspects of IoT, from advancement of technological components to application across different domains. Based on these research and innovation activities, DunavNET has created own portfolio of turnkey IoT solutions for global market. DunavNET is Microsoft's Silver partner for cloud technologies and IoT.
